BI Superstars of the Month!

Kash M.

Since starting ABA services, Kash has begun to utilize his Augmentative and Alternative Communication Device (AAC) to make a variety of different requests. He has also begun to respond to his name, following some one-step instructions, and gross motor imitation. Kash is now able to sit for an extended period of time without attempting to get up. Keep being a **superstar** Kash! We are so proud of you!

Thiago S.

When Thiago began ABA services, he was mainly using single words to communicate what he wanted. Thiago is now articulating full sentences using four words or more to communicate his wants! Thiago is also describing pictures using full sentences of four words or more. Great work Thiago, keep on being the **superstar** that you are!

REMINDER!

Monday, September 7th, is Labor Day! Although the day program will be cancelled that day, the center will remain open for 1:1 direct therapy sessions. Contact your child's therapist for more information.
